FOR IMMEDIATE RELEASE

CoFlex® AFD (Absorbent Foam Dressing) All-in-One Bandage System Introduced

New Foam Pad and Cohesive Bandage System is Quick, Easy and Cost Effective

Salisbury, MA (October 5, 2007) – Andover Healthcare, Inc. today announced the introduction of CoFlex® AFD, an all-in-one foam pad dressing and cohesive bandage.

Latex-free CoFlex® AFD is a cost-effective bandage system with a variety of applications and uses in the healthcare industry, including the wound care and emergency care markets. CoFlex AFD's highly absorbent foam pad is attached to soft, quick-stick CoFlex LF² (also latex-free) for quick and easy application. It sticks to itself without clips or fasteners, while providing controlled compression. Between the soft, non-irritating LF² layer and the absorbent foam pad is a waterproof film layer that prevents leakage, drying out and contamination. Applications and uses for CoFlex AFD include the treatment of venous leg ulcers, traumatic wounds, non-healing surgical incisions and skin tears.

CoFlex AFD is available in tan in sizes 2" x 2.5 yards, 4" x 2.5 yards and 4" x 7.5 yards. It is also available sterile.

For electronic pictures, a free sample or for more information on CoFlex AFD, please call 800.432.6686 or email mdube@andoverhealthcare.com
